## Seminar Description

The purpose of this seminar is to provide participants with an understanding of the effects of psychological arousal upon humans faced with close range interpersonal aggression. Such an understanding can prevent or limit undesired physiological arousal and/or post traumatic stress disorder. Participants will also be introduced to the concept of stress inoculation as it relates to self preservation. Finally, participants will be introduced to a body of research on the psychological effects of combat and military

violence and discuss the effects of violence on television, movies and video games on human aggression. An understanding of such research can help those faced with the likelihood of becoming involved in interpersonal violence better understand the dynamics of such an encounter and better perform under such highly stressful, rapidly evolving, ever-changing situations. Such an understanding will also contribute to early detection of potentially violent situations so they can be avoided or handled before they escalate.

## About the Presenter

A retired US Army Lieutenant Colonel, Dave Grossman is an internationally recognized scholar, author, and speaker who is one of the world's foremost experts in the field of human aggression and the roots of violence and violent crime. Dave is a former Army Ranger, West Point psychology professor and professor of Military Science who drew on his combined experience to establish the new field of scientific endeavor that has been named "Killology" which refers to the scholarly study of the destructive act. LTC Grossman has been the keynote speaker at conferences of major international and US police organizations, and he has given training presentations to literally hun-

dreds of police agencies at the local, state, and federal levels. He has served as an expert witness and consultant in numerous state and federal courts, including such high profile cases as the Paducah, KY school shootings and Timothy McVeigh trial. He also served as the key trainer of school and mental health professionals in the aftermath of the school shooting in his hometown of Jonesboro, AR. He has also trained emergency personnel, police officers and civic groups in the aftermath of the school shootings in Littleton, CO and Springfield, OR.

LTC Grossman is the author of two best selling books entitled "On Killing" and "On Combat", both of which will be available for purchase at the seminar.
